2. Central Railway Station

The railroad station. The natives think it's a fine building, but most foreigners think it looks more like a prison than anything else.

3. City Hall

The city hall. Looks very medieval, but was actually built in 1908. During the war they took the roof off to reclaim the copper, but found the contractor had gipped the city by using tin instead.

4. New Palace

Nothing can convince me that this building is either beautiful or attractive. It is a feeble copy of the Versailles palace. Was formerly the residence of the kings of Wurtemberg.
